PREFACE.

THE Library of the Royal Institution has been founded by the liberality of a few Noblemen and Gentlemen, for the immediate use of the Subscribers to that Establishment, and, it may be said, for that of the Public at large; as any person, on the recommendation of one of the Patrons, may always have access to it.

The Library, in its present state, will be found as useful as many more splendid establishments, supported by Royal or National munificence. It contains the best and most useful Edition of every Greek and Roman Classic Author, with the best translations in English, and some in other modern languages. The Class of Mathematical Science in all its branches, is very full, with the best Scientific Journals and Transactions of learned and philosophical Societies. The Historical Class, particularly the English, in its various divisions and subdivisions, will be found very interesting: the Managers having, at the formation of the Library, procured the entire collection of the late Thomas Astle, Esq. author of *The Origin and Progress of Writing*: which Library was chiefly collected by the Rev. Philip Morant, author of the *History of the County of Essex*. Many of the Books are enriched with his Manuscript Notes; particularly those relating to Biography

The usual Classification has been generally followed, with a few exceptions in some of the Classes. It has also been thought advisable to keep the Greek and Roman Classics in two distinct alphabetical Classes, rather than distribute them under their respective heads of Historians, Poets, Orators, &c.

In the alphabetical Index will be found, not only the names of Authors of entire Works, but also of those in the different Classical Collections of *Stephens*, *Grotius*, *Maittaire*, *Reiske*, *Brunck*, *Jacobs*, and *Wernsdorf*, and likewise the Writers in the great Historical Collections of *Gronovius*, *Grævius*, *Burmman*, *Sallengre*, &c.; nor is it less complete in the contents of the collections of our English Historians, by *Camden*, *Twysden*, *Fulman*, and *Gale*.

This Catalogue will be found very useful in all Libraries; as, under each head, not only all the best Authors are to be found, but also every particular Treatise contained in the Miscellaneous Collections of their Works; such as those of *Bacon*, *Newton*, *Leibnitz*, *Boyle*, and *Locke*; for instance, at page 64, among the Books on Money and Coin, will be found *Locke on Money and Coin*, with a reference that it is in the 2d volume of his Works: also, under the Class of Geography, Voyages and Travels, every distinct Voyage contained in the Collections of *Ramusio*, *Churchill*, *Harris*, &c. is arranged under the respective Island or Country therein described.

The same method is followed in all the different Classes of Science and History; and by referring to the Synoptical Table of Contents, the Reader will find a list of the best Writers on every branch of knowledge. In order to render the Lists more

complete, several Books are inserted, marked with a †, which are not at present in the Library, but are intended to be placed there when the funds of the Institution will permit them to be purchased.

Among the English Antiquities there is a frequent reference to *Antiquary Tracts*, in 5 vol. 4to.: this is a miscellaneous collection made by Mr. Astle, therefore cannot be found in the same order in other Libraries. It is also necessary to remark, to avoid the charge of inaccuracy, that allowance must always be made for the difference of *Editions*, as in the case of the Universal History, the reference being to the second Edition in Octavo, which varies in a volume or two from the first Edition of that work.

P R E F A C E

TO THE

SECOND EDITION,

1821.

SINCE the first Edition of this Catalogue was published, many of the articles marked therein as wanting have been purchased, and many of the modern Publications and Continuations of the foreign and domestic Journals have been added to the Library: it has also received several valuable donations from the Authors

of various Works.—The late Rev. Louis Dutens bequeathed by will, Eighty-nine Volumes of Miscellaneous Tracts, the principal of which are specified in the Catalogue under their respective Classes, with a reference to the volume in which they are bound. Lady Banks presented a portion of the Library of her late sister-in-law Mrs. S. S. Banks; John Guillemard, Esq. F. R. S. One Hundred and Sixty Volumes relating to America; and the British and Foreign Bible Society, Forty-four Volumes of Bibles and parts of the New Testament, in Foreign Languages.

In the Classes of *Scriptores Ecclesiastici*, (page 12) and *Auctores Classici*, (page 103) will still be found many articles marked with a dagger (†), as not being in the Library at present; but it is hoped the encreasing prosperity of the INSTITUTION will soon enable the Patrons to place them there. The advantage of such a List of Greek and Latin Authors to Scholars cannot fail to be properly appreciated, when it is known to be printed from the Manuscript of the late Rev. Dr. Charles Burney, one of the Honorary Librarians, who intended it should have been inserted in the former Edition, as will be seen by the following letter to the Editor:—

“ *To Mr. Harris, Royal Institution.*

“ Dr. Charles Burney acquaints Mr. Harris, that he drew up the Classical Catalogue with a view to its being *printed*, whole and entire. As there is no List of Greek Books so ample, he still thinks that its publication might be of service to the sale of the R. I. Catalogue; but readily submits the matter to the decision of the Patrons.

“ *Greenwich, March 3, 1809.*”

The Editor being now left to his own judgment, has not hesitated a moment to fulfil the wishes of that eminent Scholar, as a memorial of his respect and gratitude for personal favours received from him.

It has been suggested, that the making known the mode of reference to the Books in the Library of the Royal Institution will be useful to Gentlemen possessed of large libraries; this is not by the usual mode of letters of the alphabet over the cases, but by simply numbering the shelves, as 1. 2. 3. 4. &c. which may be carried on to any extent, and save the repetition and confusion of three or four letters; one of which numbers being inserted in pencil against each book in the alphabetical catalogue, is easily erased and replaced by a new number, on a change of arrangement.

GOLDEN volumes! richest treasures!
Objects of delicious pleasures!
You, my eyes rejoicing please,
You, my hands in rapture seize!
Brilliant Wits and musing Sages,
Lights who beam'd through many ages!
Left to your conscious leaves their story,
And dared to trust you with their glory;
And now, their hope of fame achiev'd,
Dear volumes! you have not deceiv'd!
